Client Feedback:

Our decision to select Kreca Renovations as the builder for our St Peters renovations was primarily because we needed a builder that could manage a complex renovation, using a broad range of finishing materials directly imported from Europe and still give the owners an element of flexibility to make alterations on the fly.

Having previously worked with Geni Kreca on a smaller renovation at a previous home, we knew Kreca Renovations would be able to manage the build as well as offering us some design flexibility along the way.

The project has been long and complicated and I am sure we have frustrated the builder by continually changing our minds on finishes....but Geni has taken it all in his stride and continually delivered exceptional results, whilst keeping expenses within budget.

The now, nearly completed renovations are a testament to Kreca renovations tenacity and drive to find innovative solutions to ensure the design integrity was not only met...but improved.
